### AMERICANISMS

the fluttenable Right of Americans to Use Them. We know now that the mother engue is a heritage and not a loan. It sours to use as we needs must. In America there is no necessity to plead for the right of the Americanism to exist. The cause is won. No American writer worth his salt would think of w thdrawing a word or of apologizing f r a phrase because it was not arrent within sound of Bow Bells. The most timid of American Auhoresses has no doubt as to her use of railroad, conductor, grade, and to switch, despite her possible knowledge that in British usage the equivalents of these words are railway, guard, gradient, and to shunt. On the con-

rary, in fact, there is visible now and again, especially on the part of the most highly cultivated writers, an obvious delight in grasping an indi-genous word racy as the soil. There is many an American expression of a pungent freshness which authors, weary of an outworn vocabulary, seize eagerly. It may be a new word, but it would not be in accord with our traditions to refuse naturalization to a welcome new-comer; or it may be a survival flourishing here in our open fields, although long since rooted out of the trim island garden on the other side of the Atlantic, and in such case we use it unhesitatingly to-day as our forefathers did in the past, following." as Lowell remarks. be John Brown's Bedy.' In an instant he would be joined by others. and soon, away down the long road as for as the column stretched, a mighty chorus would be going up, while the men would brace up, their iyes brighten, and their footsteps lose he weary movement as they kept step o the music. Twenty-five thousand or thirty thousand men stretched out over a long distance in marching, and you can imagine the effect of such a norus of male voices. Perhaps way off on some parallel road, a mile or two away, another column would be advancing, and this, too, would take up the refrain, and the effect be
